

**FREE Remote Control Interface  
for the BDI SSC-100 Smart Switch Controller!**

**Broadcast Devices Inc and Davicom are pleased to announce the release of another direct-connection interface between their products.**

Thanks to the Davicom's built-in SNMP manager and to the SSC-100's SNMP agent, the interface allows easy, one-cable interconnection between BDI's Smart Switch Controller and the DV-Mini or DV-208/216 products running firmware V5.54 or higher.

The SSC-100 is part of a growing family of BDI products that can be easily interfaced to Davicom remote control products. The SSC-100 joins the DPS-100D power meter series from BDI that Davicom has been supporting since 2013.

The interface consists of a Cat-5 cable, a DV Configuration file and DavLink Workspace file that can be simply installed in any Davicom Mini or Davicom 208/216 unit and PC. The files (for F/W v5.54) are free of charge and available for download on the Davicom web site. Please visit [www.broadcast-devices.com](http://www.broadcast-devices.com) or [www.davicom.com](http://www.davicom.com) for more information.
