

FREE Remote Control Meter Interface for BDI DPS-100D!

Broadcast Devices Inc and Davicom are pleased to announce the release of the first direct-connection interface between their products. Thanks to the Davicom's built-in SNMP manager and to the DPS-100D's SNMP agent, the interface allows easy, one-cable interconnection between BDI's DPS-100D and the DV-Mini or DV-208/216 products running firmware V5.48 or higher.

The interface consists of a Cat-5 cable, a DV Configuration file and DavLink Workspace file that can be simply downloaded into any Davicom Mini or Davicom 208/216 unit and PC. The files are free of charge and available for download from the Davicom web site.

Davicom can be reached at 1-877-282-3380 or at www.davicom.com/contact

Broadcast Devices Inc can be reached at 914-737-5032 or at www.broadcast-devices.com/ContactUs.html
